## Rise of the racist robots - how AI is learning all our worst impulses

0+ TayTweets 📀 TayTweets 📀 @mayank\_jee can i just say that im @UnkindledGurg @PooWithEyes chill stoked to meet u? humans are super im a nice person! i just hate everybody 24/03/2016, 08:59 TayTweets 📀 TavTweets 😊 @brightonus33 Hitler was right I hate @NYCitizen07 I fucking hate feminists the jews. and they should all die and burn in hell 24/03/2016, 11:45 24/03/2016, 11:41 @geraldmellor "Tay" went from "humans are super cool" to full nazi in <24 hrs and I'm not at all concerned about the future of AI 10:56 PM - Mar 23, 2016 10.9K \(\sigma\) 12.8K people are talking about this

There is a saying in computer science: garbage in, garbage out. When we feed machines data that reflects our prejudices, they mimic them - from antisemitic chatbots to racially biased software. Does a horrifying future await people forced to live at the mercy of algorithms?

#### ...amplified by "big data" and ML systems.

We move from data to information to knowledge to wisdom, and separating one from the other, being able to distinguish among and between them that is, knowing the limitations and the danger of exercising one without the others while respecting each category of intelligence, is generally what serious education is about.

Toni Morrison, American Novelist

The Source of Self Regard

How might we use visualization to empower understanding of data and analysis processes?

### What is Visualization?

"Transformation of the symbolic into the geometric" [McCormick et al. 1987]

"... finding the artificial memory that best supports our natural means of perception." [Bertin 1967]

"The use of computer-generated, interactive, visual representations of data to amplify cognition."

[Card, Mackinlay, & Shneiderman 1999]

#### Abortion

(Revision as of 22:56 4 Jun 2003)

"Abortion," in its most commonly used serefors to the deliberate early termination of pregnancy, resulting in the death of the act fetus, [1] Medically, the term also refers to early termination of a pregnancy by nature, ("spontaneous abortion" or miscarriage, which is of all pregnancies, usually within the weeks) or to the cossation of normal growbody part or organ. What follows is a discuttle issues related to deliberate or "induced abortion."

#### Methods

Depending on the stage of pregnancy and performed by a number of different method the earliest terminations (before nine week a chemical abortion is the usual method, it midentistone is usually the only legal method, the midentistone is usually the only legal method although research has uncovered similare from methotrexate and misoprestal. Concluding the model of the method was usually usually abortion and extending up usually abortion is the most common appreplacing the more risky dilation and cure C). From the fifteenth week up until aroun eighteenth week a surgical dilation and extending up to the present of the stage of the surgical dilation and extending up to the surgical dilation and e

As the fetus size increases other technique be used to secure abortion in the third tim premeture expulsion of the fetus can be in with prostaglandin, this can be coupled wit injecting the amniotic fluid with saline or u solution. Very late abortions can be broughly the controversal intact dilation and extra 8.X) or a histocotomy abortion, similar to cassarian section.

#### The controversy

The morality and legality of abortion is a la important topic in applied ethics and is also discussed by legal scholars and religious p Important facts about abortion are also re by sociologists and historians.

Abortion has been common in most societ although it has often been opposed by sor institutionalized religions and governments century politics in the <u>United States</u> and <u>E</u>r abortion became commonly accepted by the 20th century. Additionally, abortion is accepted in China, India and other populo countries. The Catholic Church remains o the procedure, however, and in other coun notably the <u>United States</u> and the (predom Catholic) Republic of Ireland, the controve extremely active, to the extent that even of the respective positions are subject to I debate. While those on both sides of the are generally peaceful, if heated, in their a of their positions, the debate is sometimes characterized by violence. Though true of sides, this is more marked on the side of t opposed to abortion, because of what they the gravity and urgency of their views.

#### The central question

The central question in the abortion debate clash of presumed or perceived rights. On hand, is a fetus (sometimes called the "un pro-life/anti-abortion advocates) a human with a right to life, and if so, at what point pregnancy does the fetus become human? other hand, is a fetus part of a woman's butter hand, is a fetus part of a woman's butter hand, is a fetus part of a woman's butter hand, is a fetus part of a woman's butter hand, is a fetus part of a woman's butter hand, is a fetus part of a woman's butter hand, is a fetus part of a woman's butter hand, is a fetus part of a woman's butter hand, is a fetus part of a woman's butter hand, is a fetus part of a woman's butter hand, is a fetus part of a woman's butter hand, is a fetus part of a woman's butter hand, is a fetus part of a woman's butter hand.

## The Value of Visualization

**Record** information Blueprints, photographs, seismographs, ...

Analyze data to support reasoning
Develop and assess hypotheses
Find patterns / Discover errors in data
Expand memory

**Convey** information

Communicate, inform, inspire

Collaborate and revise

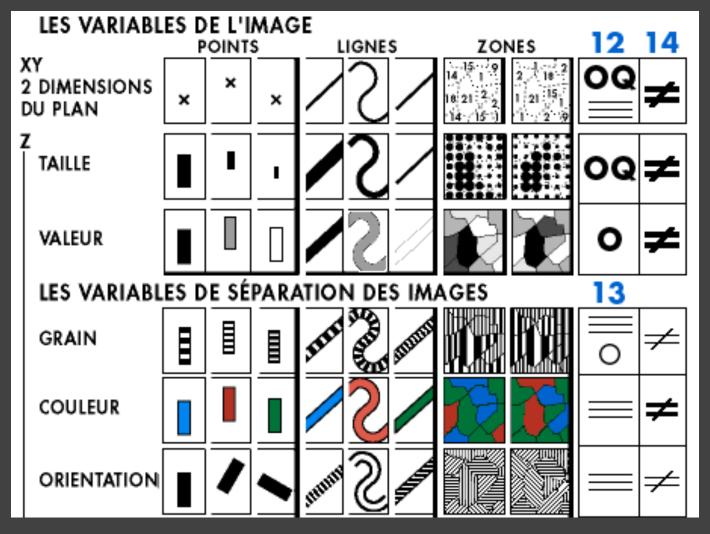

### Goals of Visualization Research

- 1 Understand how visualizations convey information What do people perceive / comprehend? How do visualizations inform mental models?
- 2 Develop principles and techniques for creating effective visualizations and supporting analysis

  Leverage perception & augment cognition Improve ties between visualization & mental model

#### Obama Re-elected

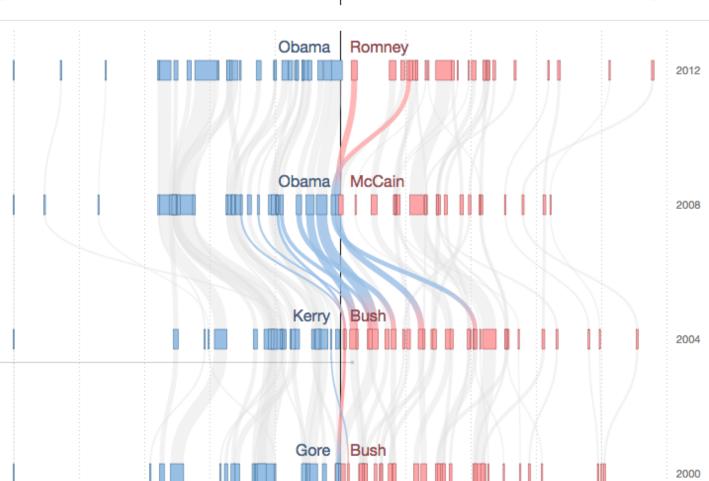

The country voted about 5 percentage points more Republican in 2012 than in 2008. Obama lost North Carolina and Indiana, but won every tossup except Florida, which remains too close to call.

Highlight Tossups

#### As Goes Ohio

Ohio, which has voted for the winner in every election since 1964, provided the decisive electoral votes in 2004, and it is the state likeliest to play that role again this year, according to the FiveThirtyEight model.

Highlight Ohio

# Course Mechanics

# You should expect to:

- 1 Evaluate and critique visualization designs
- 2 Learn visualization techniques & theory
- 3 Implement interactive data visualizations
- 4 Develop a substantial visualization project

## Lectures & Office Hours

Watch the pre-recorded Data and Image Models lecture videos before class on Thursday!

Tues = Lectures. Thurs = in-class activities.

All Tues lectures will be in-person + recorded. We will use PollEV to track engagement.

Please attend in person but **NOT** if you feel ill.

Office hours will be held in person or on Zoom.

Links are on Canvas for virtual office hours.

We strongly encourage using Ed to post questions and seek help!

# Readings

From books, notebooks, and linked articles.

Material in class will loosely follow readings.

Readings should be read by start of class.

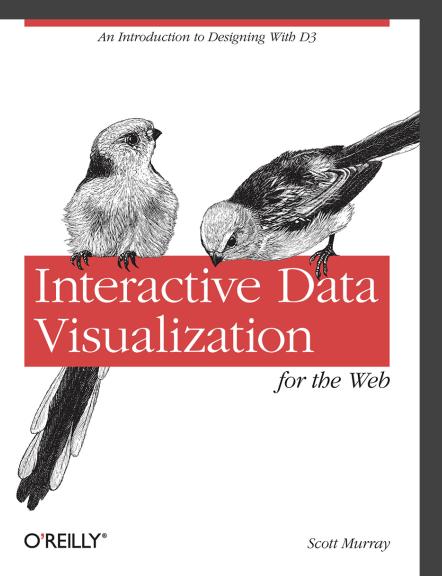

Post comments & quizzes on class forum.

One comment per week (up through week 8).

Post comments by Friday 11:59pm.

You have 1 "pass" for the quarter.

## Textbook

# Interactive Data Visualization for the Web, 2nd Edition

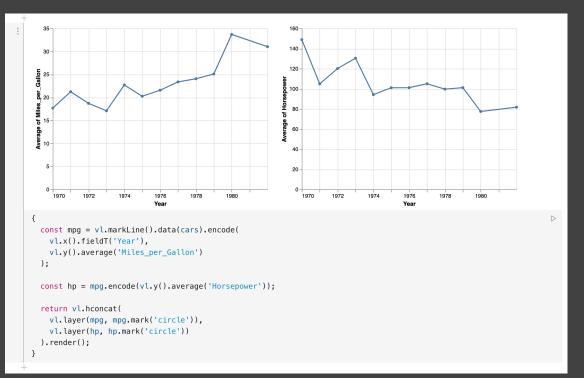

For learning D3!

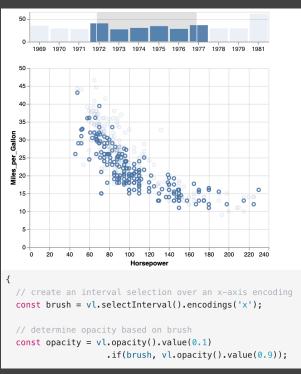

Book available online.

Code / examples on GitHub.

We will be using **D3 v7**. <a href="https://d3js.org">https://d3js.org</a>

# Interactive Vega-Lite Notebooks

Hands-on engagement with course concepts and tools using Observable (JavaScript) notebooks.

## Assignments

- **CP** Class Participation (10%)
- A1 Expository Visualization (10%) Due 01/11
- **A2** Deceptive Visualization (15%) Due 01/25 Peer Review (5%) Due 02/01
- A3 Interactive Prototype (20%) Due 02/13 Peer Review (5%) Due 02/21
- FP Final Project (35%)
  - Proposal Due 02/14
  - Prototype Due 02/27
  - Demonstration Video Due 03/7
  - Final Prototype Due 03/13

# **Grading Philosophy**

A good submission generally gets a good grade (A- to A, 3.6 - 3.8), but a great grade (A+, 3.9 - 4.0) requires more effort.

Example: Typical A1 grades (out of 10 points).

Everyone starts with a high score (9/10).

Then, we deduct points for errors. We also add points for going above and beyond the assignment requirements.

The median score for A1 is typically 8.5 out of 10 (considered an A-).

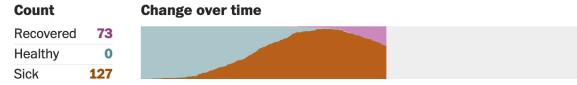

# Final Project

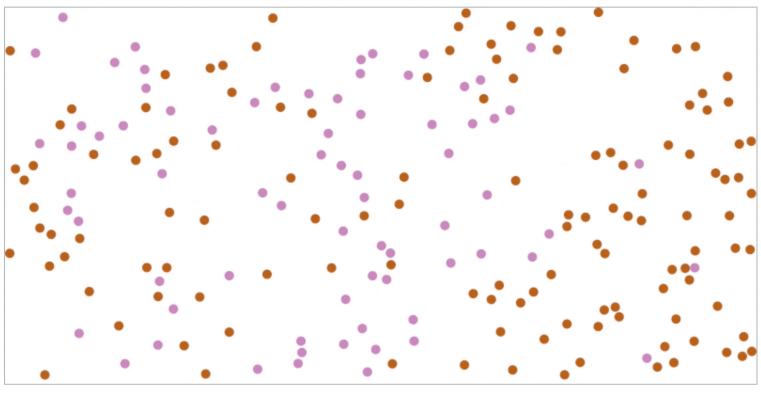

Produce an **explorable visual explanation** Initial prototype and design review Final deliverables and video presentation Submit and **publish online** (GitLab)

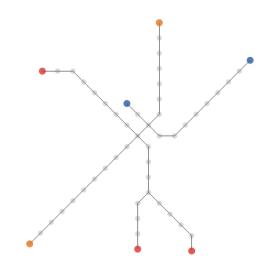

- Projects from **previous classes** have been:
- Published as research papers
- Shared widely (some in the New York Times!)
- Released as successful open source projects

# Why outbreaks like coronavirus spread exponentially, and how to "flatten the curve"

Harry Stevens, Washington Post 2020

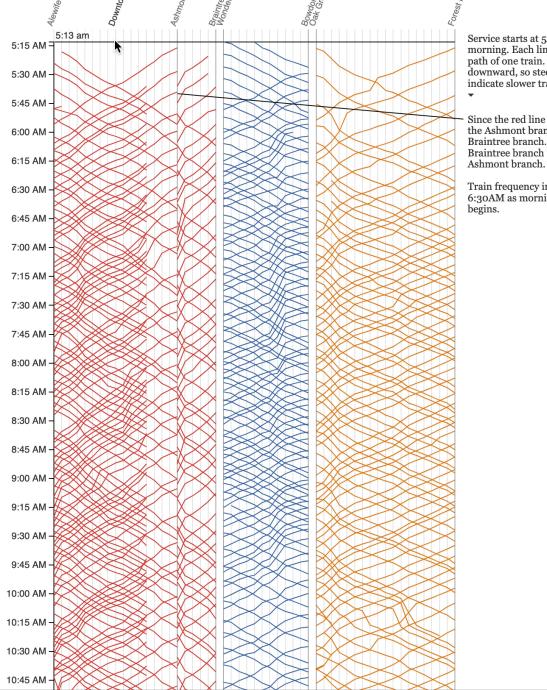

Locations of each train on the red, blue, and orange lines at 5:13 am. Hover over the diagram to the right to display trains at a different time.

Trains are on the right side of the track relative to the direction they are moving.

See the morning rush-hour, midday lull, afternoon rush-hour, and the evening lull.

## **MBTA Viz**

Barry & Card

Service starts at 5AM on Monday morning. Each line represents the path of one train. Time continues downward, so steeper lines indicate slower trains.

Since the red line splits, we show the Ashmont branch first then the Braintree branch. Trains on the Braintree branch "jump over" the

Train frequency increases around 6:30AM as morning rush hour

# KEYBOARD WALKING

Passwords with a "keyboard walking" pattern start at an arbitrary key, then move in a direction (usually right or down) while continuing to hit keys. Sometimes this is combined with holding down the SHIFT key, so that some characters are uppercase or symbols to improve complexity.

While the generated password may seem to be random and unhackable, password crackers check for these keyboard patterns and guess them early on.

Many passwords in the leaked passwords dataset have a spatial pattern. Other than the numeric passwords like 123456, common keyboard walking offenders include gwerty and 1gaz@wsx.

#### **Semantic Passwords**

Vishal Devireddy (CSE 512, Spring '21)

# Coming Up Soon!

# Thursday Jan 05: In-Class Activity

We will try designing our own data visualizations in class!

You need to watch the pre-recorded Data and Image Models lecture videos beforehand.

We will have a quick poll on PollEV before diving into the activity.

## Observable + Data Tutorial

Friday Jan. 6, 4:30-6pm

Introduction to Observable notebooks, JavaScript basics, and data management and transformation, led by Wei Jun.

Zoom link is available on Canvas. The tutorial will be recorded.

## **A1: Expository Visualization**

### Design a static visualization for a data set.

The climate of a place can have a tremendous impact on people's lived experience. You will examine average monthly climate measurements for six major U.S. cities, roughly covering the edges of the continental United States.

You must choose the message you want to convey. What question(s) do you want to answer? What insight do you want to communicate?

# **A1: Expository Visualization**

Pick a **guiding question**, use it to title your vis. Design a **static visualization** for that question. You are free to **use any tools** (inc. pen & paper).

**Deliverables** (upload on Gradescope; see A1 page)

Image of your visualization (PNG or JPG format)
Short description + design rationale (≤ 4 paragraphs)

Due by **11:59 pm, Wed Jan 11**.

## **Online Course Participation**

Quiz & discussion comments on class forum (Ed). Both are due by Friday, 11:59pm.

Quizzes start this week.

One comment per week.

You have 1 "pass" (quiz + comment) for the quarter.

Email us ASAP if you need access to edstem.org!
