Illegible Visualizations

People will get lost in the details or overwhelmed by complexity

…if we make things intentionally complex people then people may just assume we know what we're talking about or will be too dazed to check too closely.

Deceptive Visualizations

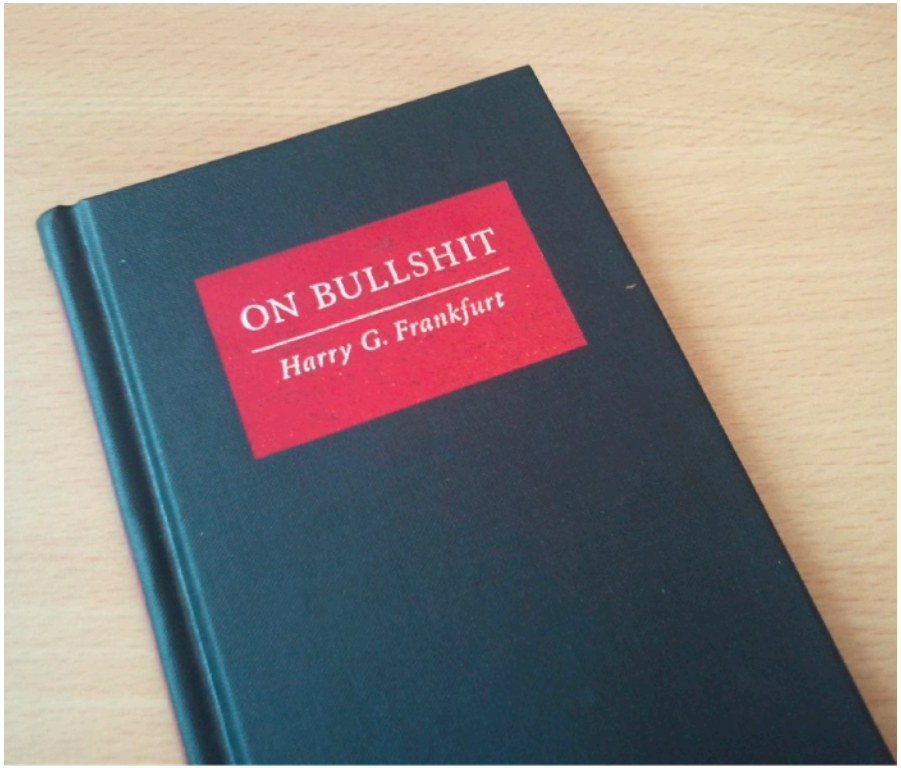
Incorrect Visualizations

Illegible Visualizations

Bullshit Visualizations

Unconventional Visualizations

Bullshit Visualization



Lie:

"No, officer, I wasn't speeding"

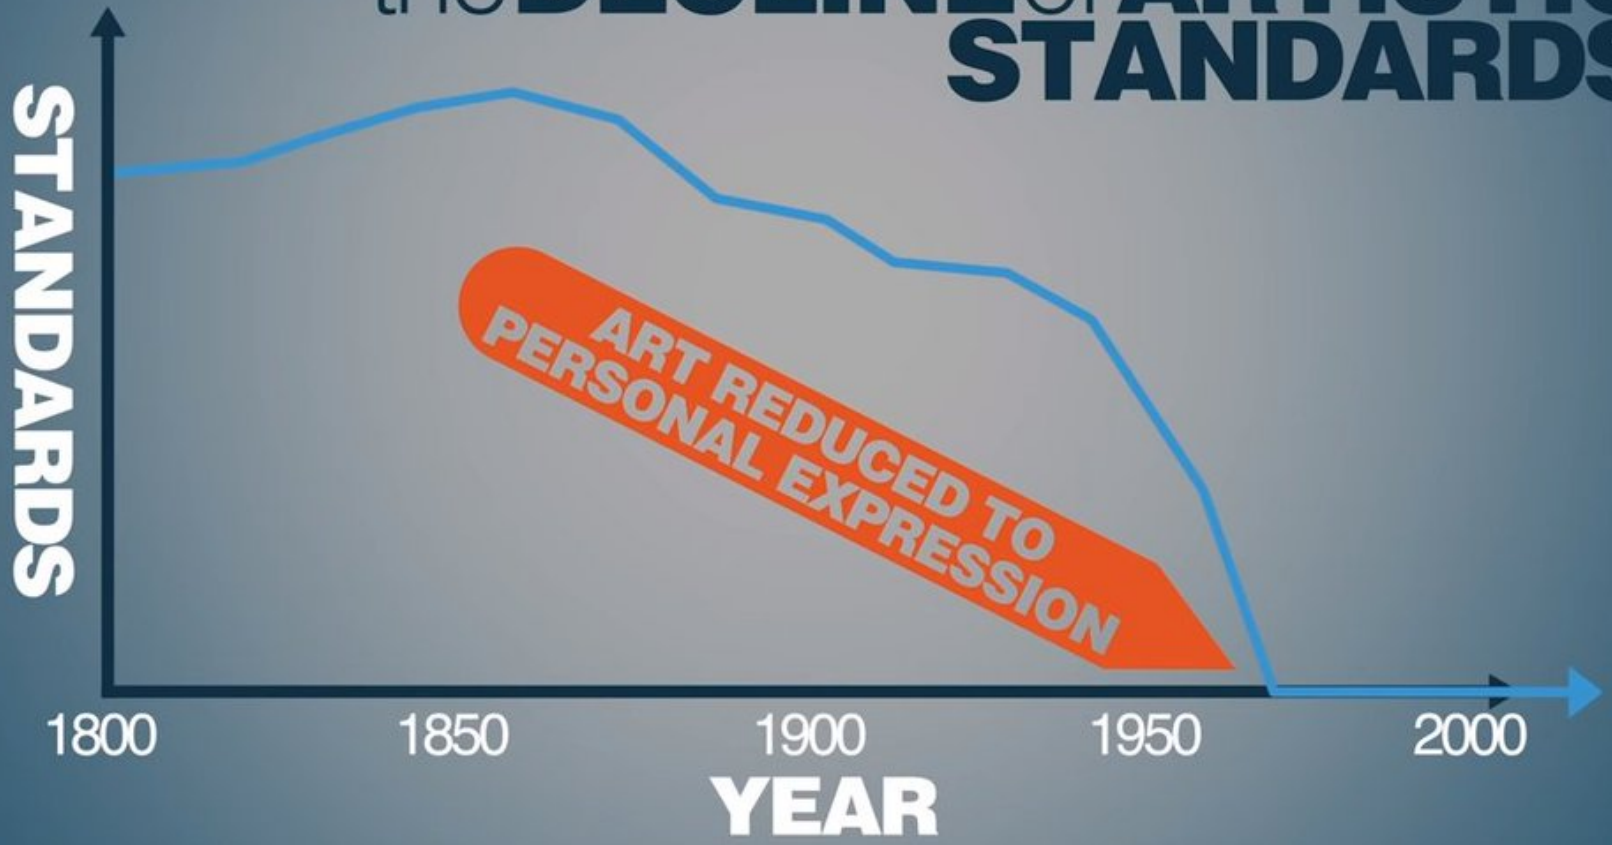
(you know the truth, but intentionally say something you know is untrue)

Bullshit:

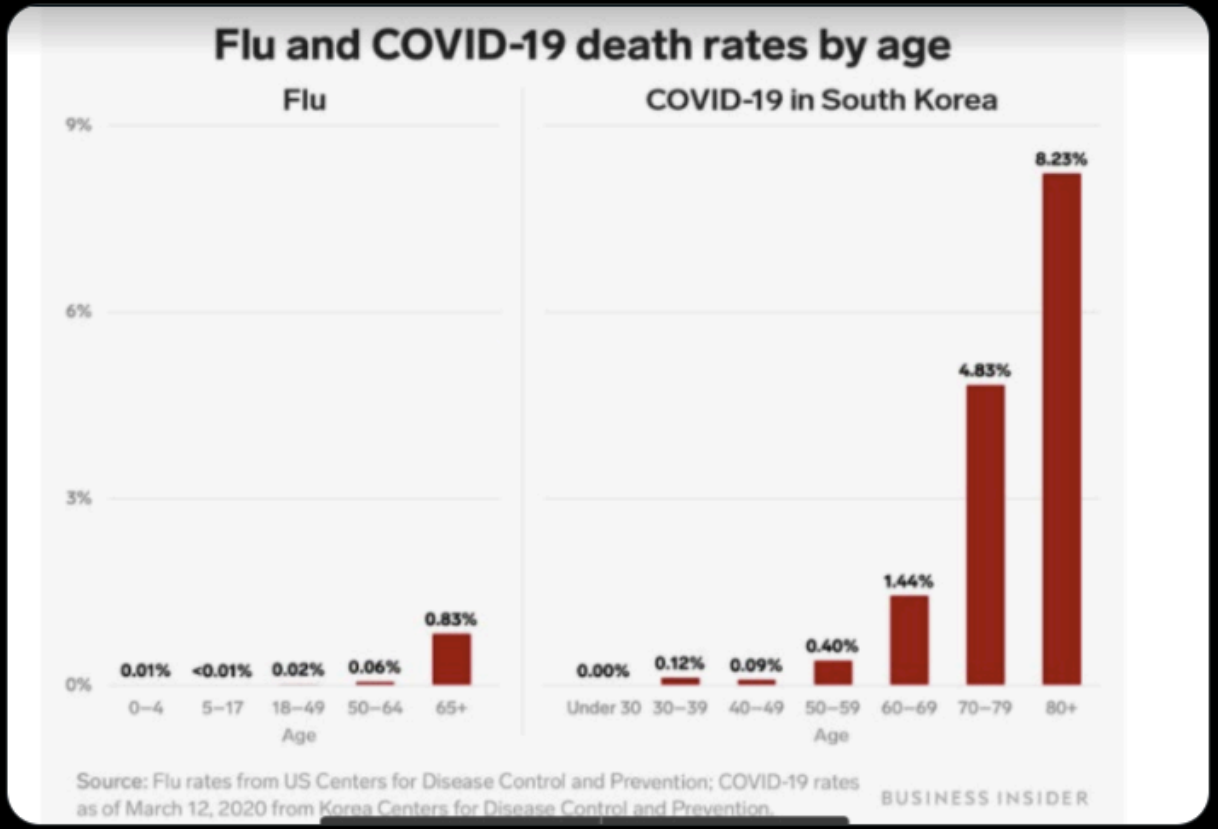
"The party was lame anyways, it's good I wasn't invited"

(you don't know or don't care about the truth, but intentionally say something you hope is persuasive)

the DECLINE of ARTISTIC STANDARDS



For people under 60, coronavirus is LESS dangerous than the seasonal flu:



Bullshit Visualizations

You can just make stuff up with no connection to reality

…show stuff that looks like data but isn’t

…assume a conclusion and pretend it’s true

…or give people data they can’t do anything with

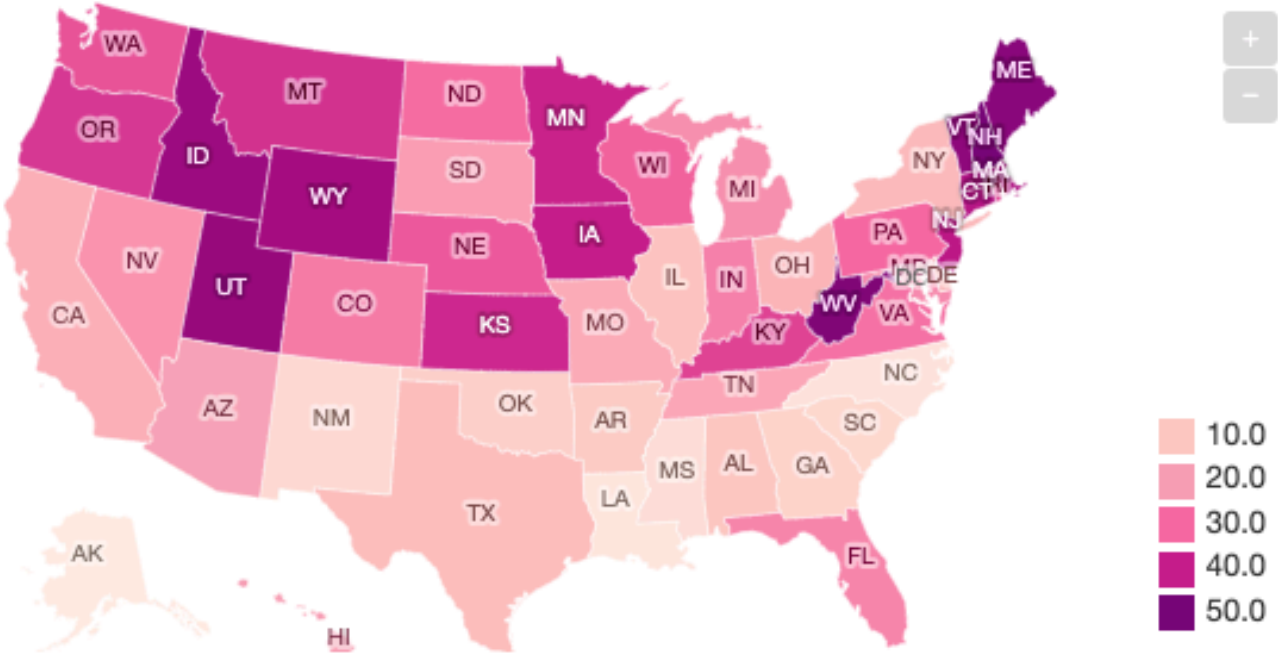
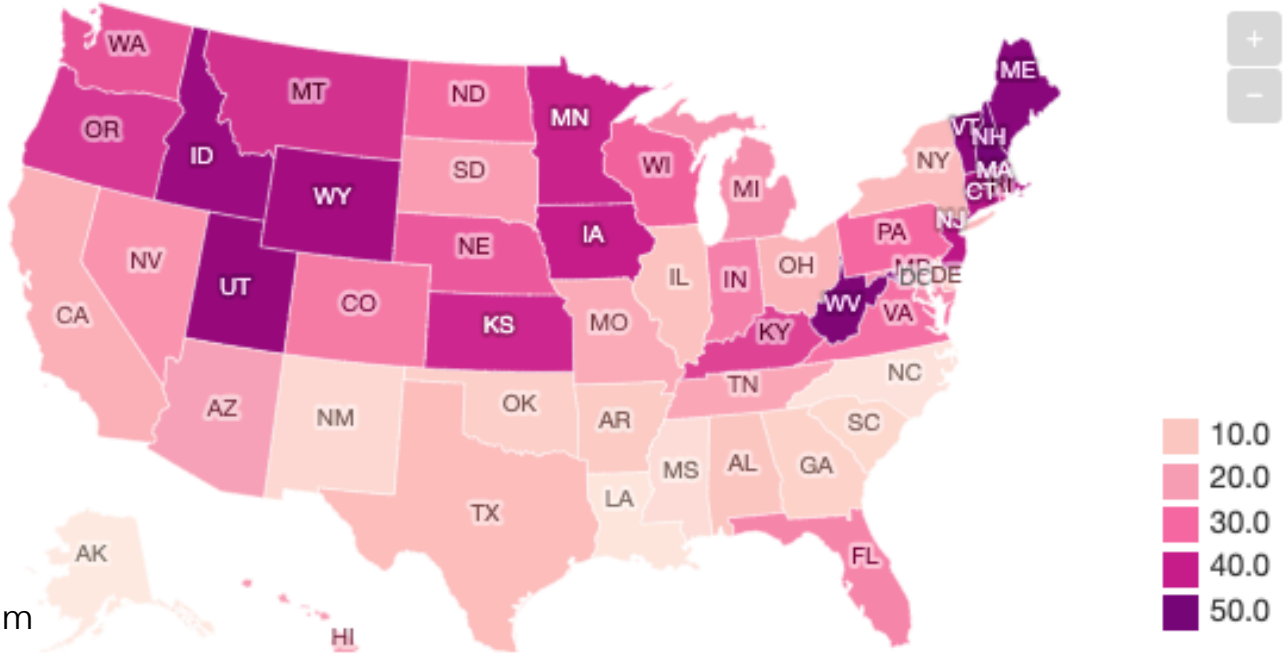
Which states have the most STIs?



Which states have the most STIs?



"Each state has been rated from one to 50: the higher the score, the smaller the proportion of STIs. So on the map - the darker the color, the smaller the rate of STIs."

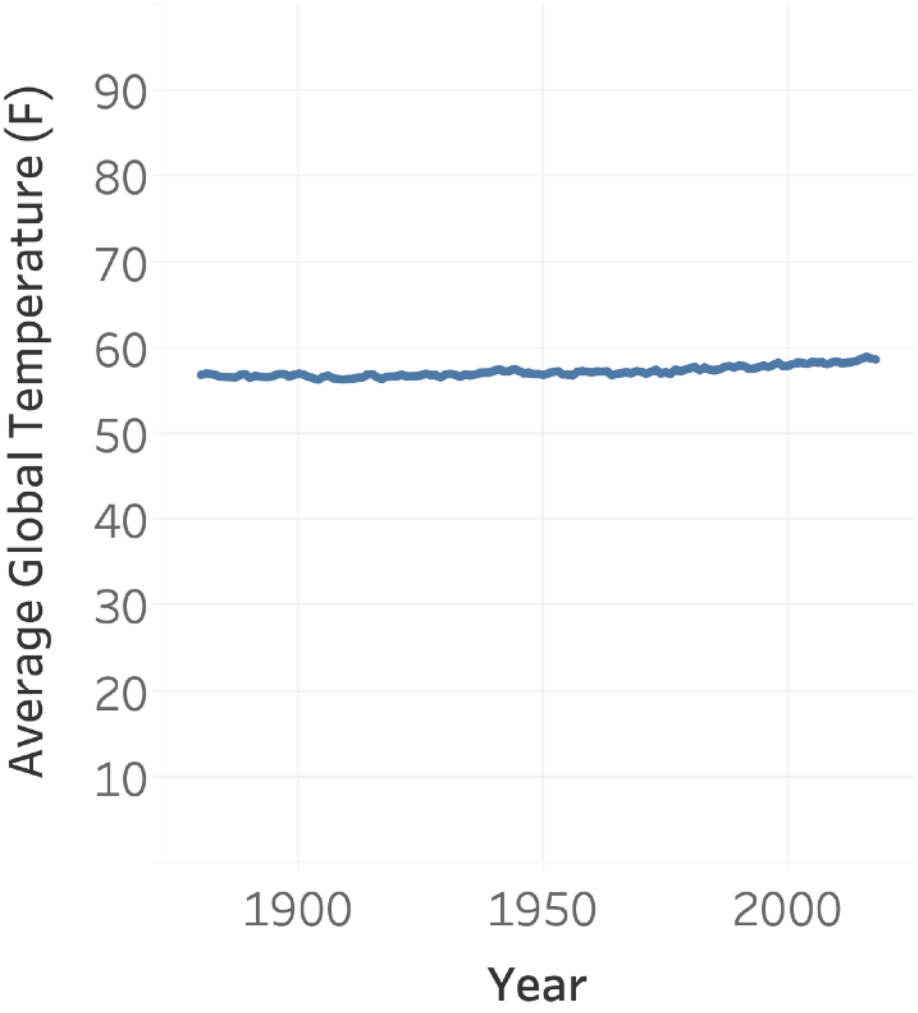
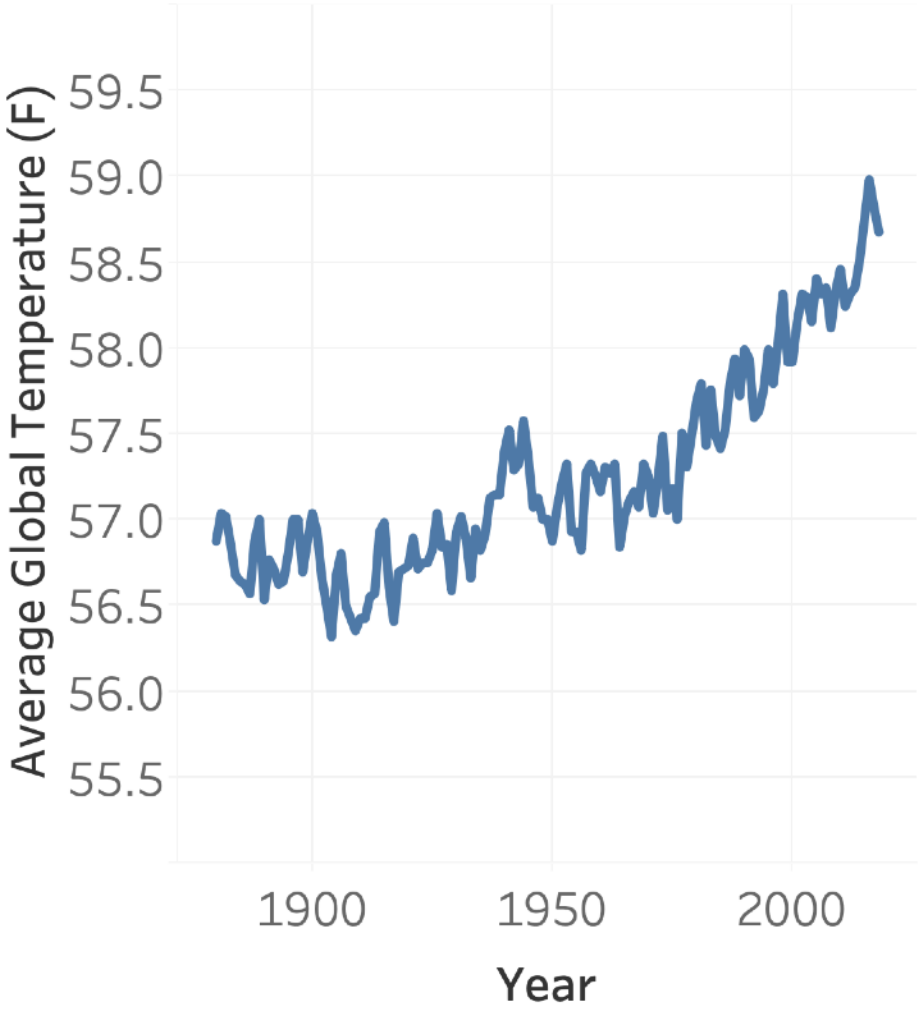
NRO



NRO (Truncated)



Unconventional Visualizations

People have tacit conventions on how they interpret charts (around colors, axes, slopes)

…if you violate those conventions, you can catch people off guard.

Deceptive Visualization Wrap-Up

Ways to mislead:

Breaking assumptions, expectations, conventions, drowning people in details… or just making stuff up.

Context matters:

Not every chart that breaks a design “rule” is misleading

Not every chart that follows the design “rules” is truthful

Administrivia

A2: Deceptive Visualization

Design **two** static visualizations for a dataset:

1. An *earnest* visualization that faithfully conveys the data
2. A *deceptive* visualization that tries to mislead viewers

Your two visualizations may address different questions.

Try to design a deceptive visualization that appears to be earnest: *can you trick your classmates and course staff?*

You are free to choose your own dataset, but we have also provided some preselected datasets for you.

Submit two images and a brief write-up on Gradescope.

Due by **Wed 10/16 11:59pm**.
