One Look Is Worth A Thousand Words--

One look at our line of Republic, Firestone, Miller and United States tires can tell you more than a hundred personal letters or advertisements.

WE WILL PROVE THEIR VALUE
BEFORE YOU INVEST ONE DOLLAR
IN THEM.

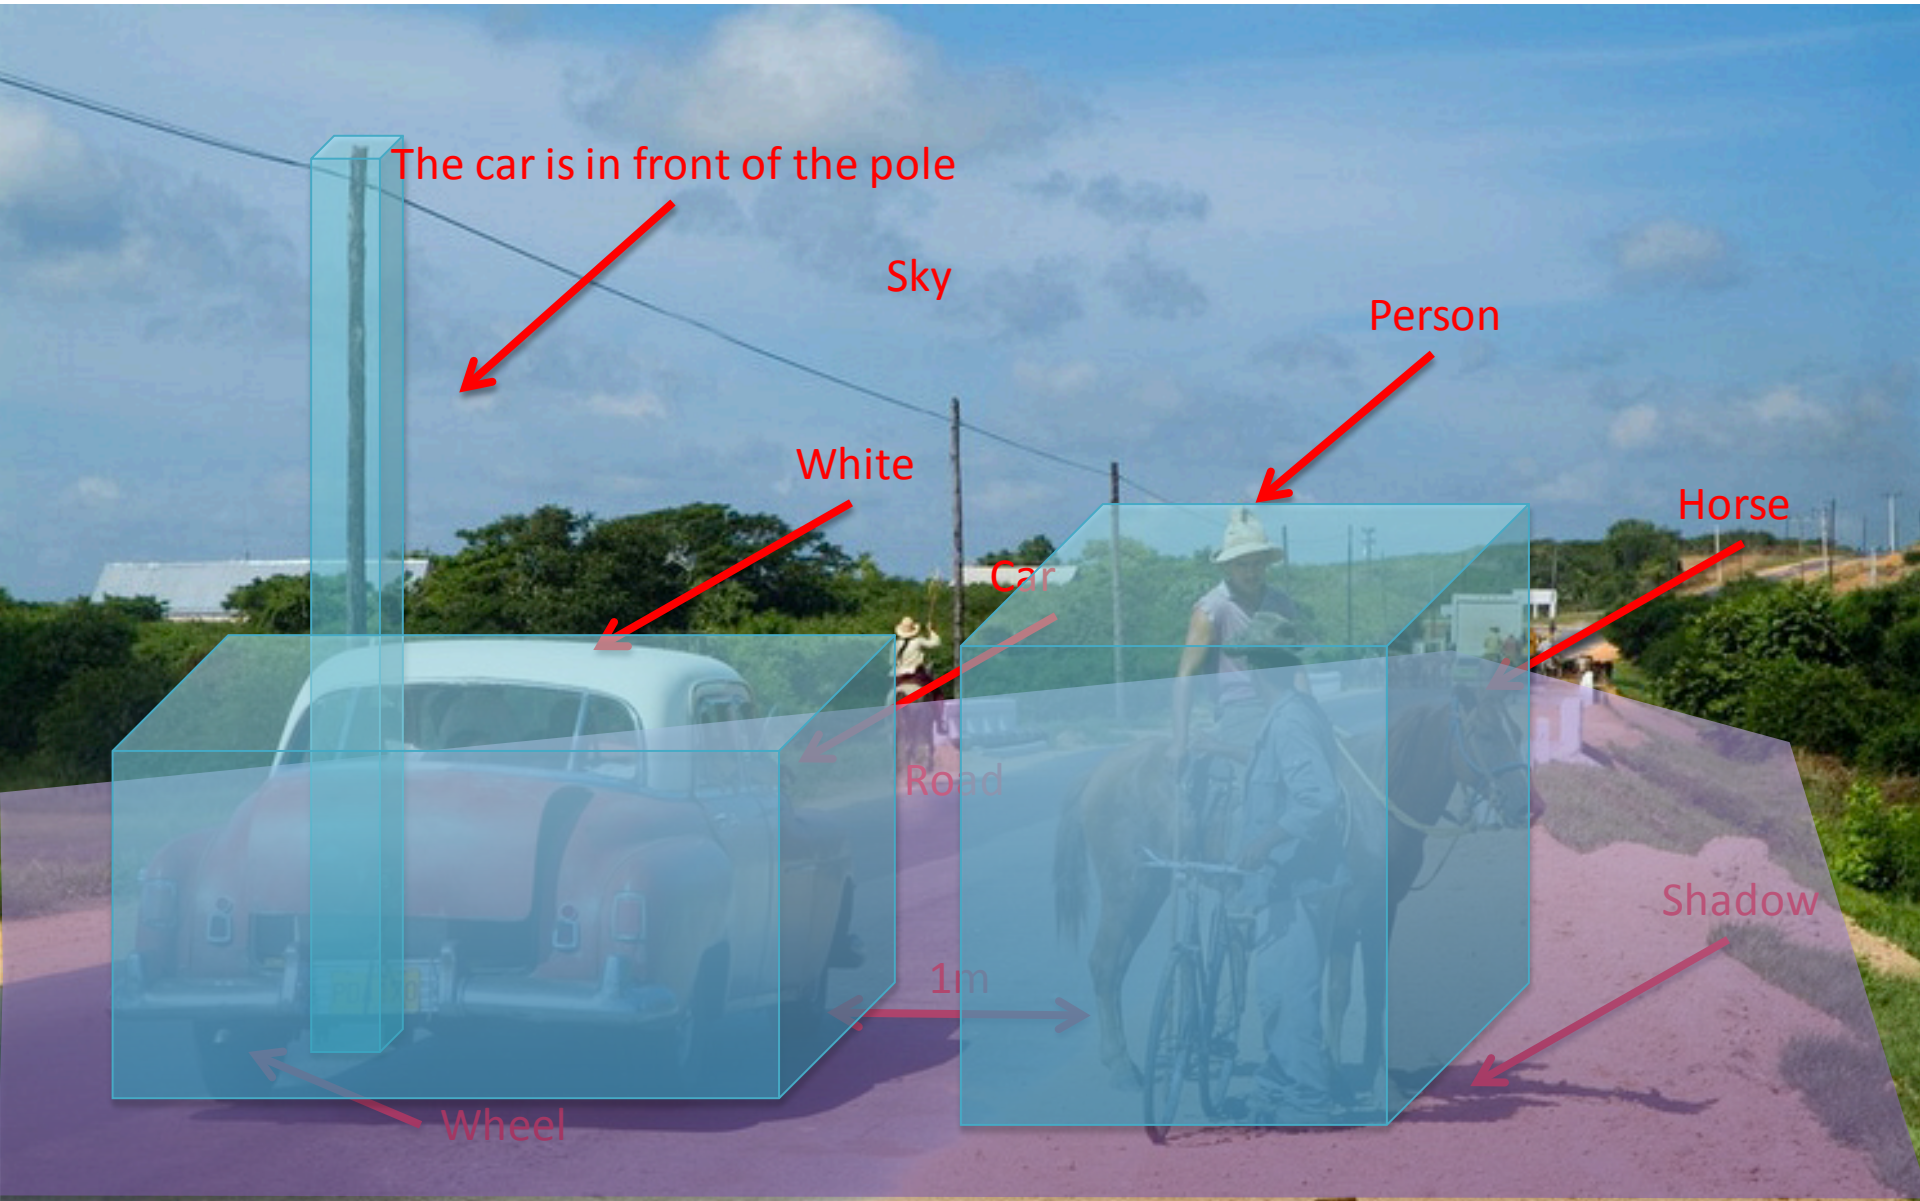

Ever consider buying Supplies from a catalog?

What's the use! Call and see what you are buying. One look at our display of automobile and motorcycle accessories will convince you of the fact.

THAT WE HAVE EVERYTHING FOR
THE AUTO

Piqua Auto Supply House

133 N. Main St.—Piqua, O.

 - Canon, Sony, Fuji, ...

Vision-based interaction: Xbox Kinect

How hard is computer vision?

Marvin Minsky, MIT
Turing award, 1969

“In 1966, Minsky hired a first-year undergraduate student and assigned him a problem to solve over the summer: connect a television camera to a computer and get the machine to describe what it sees.”

Crevier 1993, pg. 88

MASSACHUSETTS INSTITUTE OF TECHNOLOGY

PROJECT MAC

Artificial Intelligence Group
Vision Memo. No. 100.

July 7, 1966

THE SUMMER VISION PROJECT

Seymour Papert.

The summer vision project is an attempt to use our summer workers effectively in the construction of a significant part of a visual system. The particular task was chosen partly because it can be segmented into sub-problems which will allow individuals to work independently and yet participate in the construction of a system complex enough to be a real landmark in the development of "pattern recognition".

Marvin Minsky, MIT
Turing award, 1969

Gerald Sussman, MIT
(the undergraduate)

“You’ll notice that Sussman never worked
in vision again!” – Berthold Horn

Why vision is so hard?

Why is vision so hard?

- Ill-posed problem

[Sinha and Adelson 1993]

Challenges 1: view point variation

Challenges 2: illumination

Challenges 3: occlusion

Magritte, 1957

Challenges 4: scale

Challenges 5: deformation

Challenges 6: background clutter

Klimt, 1913

slide by Fei Fei, Fergus & Torralba⁴¹

Challenges 7: object intra-class variation

Challenges 8: local ambiguity

Challenges 9: the world behind the image

Smile detection

The Smile Shutter flow

Imagine a camera smart enough to catch every smile! In Smile Shutter Mode, your Cyber-shot® camera can automatically trip the shutter at just the right instant to catch the perfect expression.

Face recognition: Apple iPhoto, Facebook, Google, etc

Object recognition (in supermarkets)

[LaneHawk by EvolutionRobotics](#)

“A smart camera is flush-mounted in the checkout lane, continuously watching for items. When an item is detected and recognized, the cashier verifies the quantity of items that were found under the basket, and continues to close the transaction. The item can remain under the basket, and with LaneHawk, you are assured to get paid for it... “

Computer alert for drowning girl

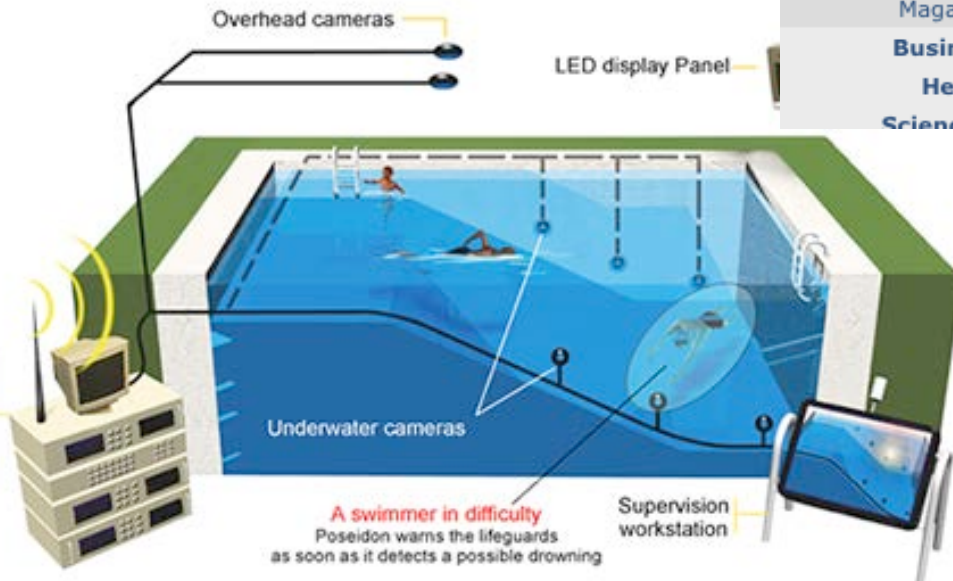

A 10-year-old girl has been saved from drowning by a computer system designed to raise the alarm when swimmers get into difficulties.

[▶ VIDEO](#) **Watch the rescue**

The girl, from Rochdale, was at the deep end of the pool in Bangor, north Wales, when she sank to the bottom.

The £65,000 system, called Poseidon, detected her on the pool floor and sounded the alarm. A lifeguard pulled her out and she recovered in hospital.

December 4, 2009 (CHICAGO) (WLS) -- Chicago police have closed the case in the death of Chicago School Board President Michael Scott.

Police Supt. Jody Weis says investigators used police cameras in the city to trace Scott's last steps in the hours before his body was found in November.

Scott's death has been ruled a suicide. The medical examiner's office concluded --not long after Scott's body was found -- that he had committed suicide. Police did not dispute the finding but wanted to pursue all the investigative leads they could. They say they have done that and have now reached the same conclusion.

Automotive safety

The screenshot displays the Mobileye website interface. At the top, there are navigation tabs for 'manufacturer products' and 'consumer products'. The main header reads 'Our Vision. Your Safety.' Below this is a top-down view of a car with three camera fields of view highlighted: 'rear looking camera', 'side looking camera', and 'forward looking camera'. The right sidebar contains a 'News' section with two articles: 'Mobileye Advanced Technologies Power Volvo Cars World First Collision Warning With Auto Brake System' and 'Volvo: New Collision Warning with Auto Brake Helps Prevent Rear-end'. Below the news is an 'Events' section listing 'Mobileye at Equip Auto, Paris, France' and 'Mobileye at SEMA, Las Vegas, NV'. The main content area features three product highlights: 'EyeQ Vision on a Chip' with an image of the chip, 'Vision Applications' showing a pedestrian detection box around a person, and 'AWS Advance Warning System' with a circular display showing a car icon and a '0.8' value.

Computer vision in the real-world

- Most examples are less than 5 years old
- Very active research area. Many new applications to come.
- A website of computer vision industries maintained by Prof. David Lowe (UBC):

<http://www.cs.ubc.ca/~lowe/vision.html>

Topics

- Filtering, Sampling, Edge Finding, Transformations
- Color, Texture, Segmentation
- Interest Points and Region Descriptors
- Image Stitching
- Cameras, Stereo, Reconstruction
- Motion, Optical Flow
- Content-Based Image Retrieval
- Object Detection and Recognition
- 3D Shape
- Applications

Grading

- Four assignments (70%)
 - Using Qt (cross platform UI in c++) qt.nokia.com
 - Use of interactive UIs for exploring and gaining intuition
 1. Filters, edge detection, segmentation
 2. Creating panoramas
 3. Computing depth from stereo
 4. Face detection
- Two Exams (30%)

Project 1: Image Filtering

Project 2: Panorama Stitching

Project 3: Stereo Reconstruction

Project 4: Face Detection

Books

Older, but designed for undergrads and has the basics. Chapters available from our web page.

Newest and available as a pdf online.
