KALAH TOURNAMENT RESULTS

ROUND 1:

- No knowledge of relative ai strengths, so just paired up players based on the ordering in the downloaded Canvas submissions
- First game started by player 1, second game started by player 2
- In case of tie, both players advance to the next round
- "techdiffs" – Any issues that prevented initiation or continuation of the game. In other words, a variety of bugs, many likely involving occasional edge cases, as they showed up at various times during the course of the game concerned, from the start to almost at the end of the game. Wherever they showed up, they were treated as a "forfeit" and the other player won that game.
- In case number of players is odd, final pair contains 1 randomly selected opponent, whose performance in this "extra round" is solely used to determine the fate of the last, unmatched competitor (i.e. cannot be used as a second chance to advance to the next round)
