

In-Home Localization

Andrew Dwersteg, Tobin Gonzalez, Trent Walkiewicz,
and Jason Won

*Providing a user's in-home location context to enable
smarter home applications*

Vision:

Smart homes will take intelligent action based on where you are
(turn on/off lights, play media, etc.)

Problem:

How to get your location without lots of expensive equipment or home retrofit?

Solution:

Compare room's Wi-Fi "fingerprint" to what your smartphone sees
