

Notes:

- Lab 1 is online
 - Be sure to test out connecting to your VM EARLY.
 - If you have any issues you want to figure them out now.
- Miles' office hours are today at 3:30 in CSE 022

Lab 1

- 7 targets for you to exploit
- Write 1 'sploit' per target
- Goal: Get a shell open on the machine by passing an exploiting argument to the target.
- What you will use:
 - gdb
 - Assembly
 - Hex \leftrightarrow Dec math
 - Strings in C
 - Memory allocation/stack manipulation
 - Etc.

Lab 1 (cont)

- **DO NOT CHANGE THE TARGET FILES!**
- Follow the directions to connect to your VM.
- You have exploits 1-3 due **next** Friday (April 13th) at 5:00 PM.
- Exploits 4-7 are due Friday April 20th at 5:00 PM.
- Turn in: a hash of your exploits
