CSE 484 / CSE M 584: Physical Security

Fall 2024

Franziska (Franzi) Roesner

franzi@cs

Announcements

- **Last extra credit reading due** Thursday [tomorrow]
- **Final project due** next Tuesday [**12/10**]
  - No late days
- **No section this week**
  - Extended office hours!

Physical Security

- Relate physical security to computer security
  - Locks, safes, etc.
- Why?
  - More similar than you might think!
  - Lots to learn:
    - Computer security issues are often abstract; hard to relate to
    - But physical security issues are often easier to understand
  - Hypothesis:
    - Thinking about the "physical world" in new (security) ways will help you further develop the "security mindset"
    - You can then apply this mindset to computer systems, …

Remember This Example?

Remember This Example?

Physical Security: Adversarial Goals

- **Confidentiality:** adversary should not be able to enter and steal information (e.g., see spy movies, or think about bank computer screens facing windows)

- **Integrity:** adversary should not be able to enter property and remove items, damage items, or place new items (e.g., installing spy device)

- **Availability:** adversary should no be able to deny legitimate entry (denial of service) into an environment (e.g., put superglue in a lock, or gum, or break a wrong key in lock)

Physical Security: Approaches to Security

- Prevention
  - Stop an attack
  - E.g., door locks and fences and bars on windows in physical world environment
- Detection
  - Detect an ongoing or past attack
  - E.g., video camera in physical world environment
- Response
  - Respond to attacks
  - E.g.., home alarm system that calls police when entry is detected

Physical Security is Part of Digital Security

- Securing a system involves a whole-system view
    - Cryptography
    - Implementation
    - People
    - **Physical security**
    - Everything in between

- This is because "security is only as strong as the weakest link," and security can fail in many places
    - No reason to attack the strongest part of a system if you can walk right around it.

Lockpicking

- The following slides will not be online.

- But if you're interested in the subject, we recommend:
  - Blaze, "Cryptology and Physical Security: Rights Amplification in Master-Keyed Mechanical Locks"
  - Blaze, "Safecracking for the Computer Scientist"
  - Tool, "Guide to Lock Picking"
  - Tobias, "Opening Locks by Bumping in Five Seconds or Less"

- Careful: possessing lock picks is legal in Washington State, but not everywhere!

Course Evaluation

- Please fill out the course evaluation!
  - https://uw.iasystem.org/survey/297075
  - Or check email

- A good activity for when you are done lockpicking or while you are waiting for locks ☺
