Non-Linear IMCI

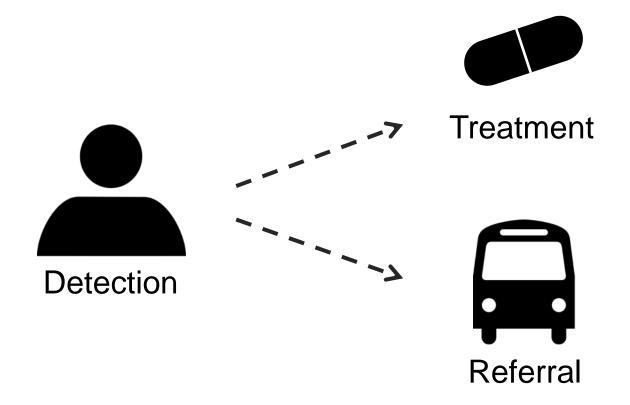

Aligning diagnostics with clinical practice

Bryan Eastes - Bennett Ng - Adam Rule

10 million children

Pneumonia Diarrhea Malaria

Department of Child and Adolescent Health and Development (CAH)

INTEGRATED MANAGEMENT OF CHILDHOOD ILLNESS

CHILD AGED 2 MONTHS UP TO 5 YEARS

ASSESS AND CLASSIFY THE SICK CHILD

Assess, Classify and Identify Treatment

Check for General Danger Signs2	
Then Ask About Main Symptoms:	
Does the child have cough or difficult breathing?2	
Does the child have diarrhoea?	
Does the child have fever?4	
Does the child have an ear problem?5	
Then Check for Malnutrition and Anaemia	
Then Check the Child's Immunization Status7	
Assess Other Problems	

TREAT THE CHILD

Teach the mother to give oral drugs at home:

Oral Antibiotic.	8
Ciprofloxacin	8
Iron	9
Co-artemether	9
Bronchodilator	q

Teach the Mother to Treat Local Infections at Home

Clear the ear by dry wicking and give eardrops 10
Treat for mouth ulcers and thrush10
Soothe throat, relieve cough with safe remedy10
Treat eye infection10

Give Preventive Treatments in Clinic

Vitamin A	11
Mebendazole	.11

Give Emergency Treatment in Clinic only

Quinine for severe malaria	.12
Intramuscular Antibiotic	.12
Diazepam for convulsions	12
Treat low blood sugar	.13

TREAT THE CHILD, continued

Give Extra Fluid for Diarrhoea and Continue Feeding

P	lan A:	Treat	for	Diarrhoea at Home	
P	lan B:	Treat	for	Some Dehydration with	ORS 14
P	lan C:	Treat	for	Severe Dehydration Qui	ckly 15

Give Follow-up Care

Pneumonia 16	ò
Dysentery	ò
Persistent diarrhoea	ò
Malaria	7
Fever- malaria unlikely17	7
Measles with eye or mouth complications 17	7
Ear Infection 18	3
Feeding problem	3
Anaemia 18	3
Pallor	3
Very Low Weight 18	3
Severe uncomplicated malnutrition18	

COUNSEL THE MOTHER

Assess the feeding of sick infants 19	9
Feeding Recommendations 20)
Counsel the mother about feeding Problems	1
Counsel the mother about her own health	2
Advise mother to increase fluids during illness 23	3
Advise mother when to return to health worker23	
Advise mother when to return immediately 23	3

SICK YOUNG INFANT AGED UP TO 2 MONTHS

ASSESS, CLASSIFY AND TREAT THE SICK YOUNG INFANT

Assess, Classify and Identify Treatment

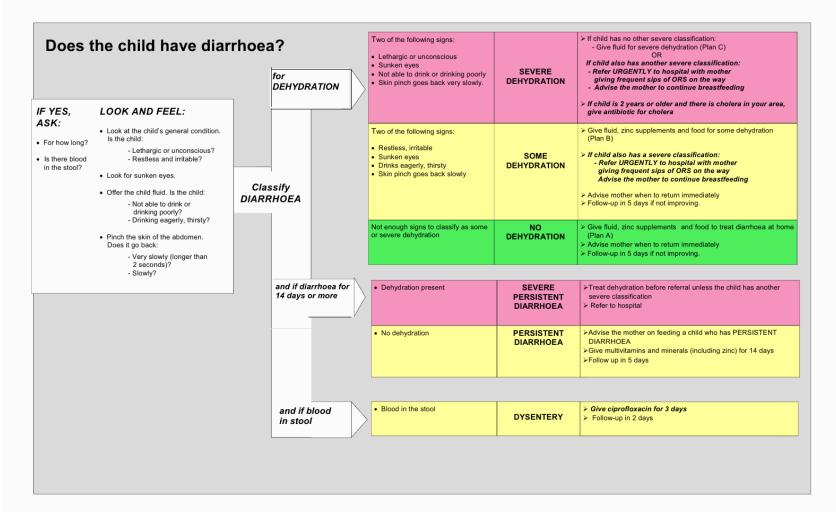

Check for Severe Disease and Local Infection	24
Then check for Jaundice	
Then ask: Does the young infant have diarrhoea?	
Then check for Feeding Problem or Low Weight for Age	27
Then check the young infant's immunization status	
Assess Other Problems	

Treat the Young Infant and Counsel the Mother

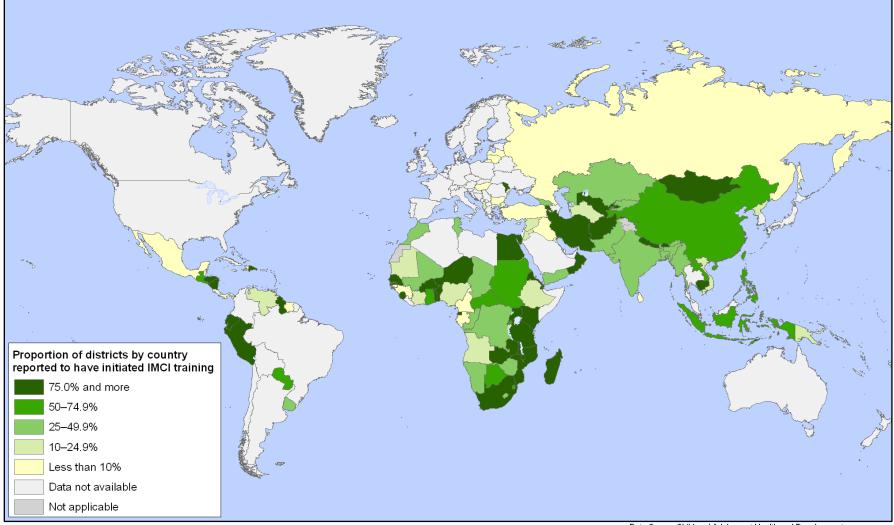

Intramuscular antibiotics	
Treat the young infant to prevent low blood sugar	29
Keep the young infant warm on the way to hospital	
Oral antibiotic.	
Treat local infections at home	31
Correct positioning and attachment for breastfeeding	
Teach mother how to express breast milk	
Teach mother how to feed by cup	
Teach the mother to keep the low weight infant warm at home	
Advice mother to give home care to the young infant	

Give Follow-up Care for the Sick Young Infant

Local Bacterial Infection	
Jaundice.	
Diarrhoea	35
Feeding Problem	
Low Weight for age	
Thrush
