

Standard Assignment

Due prior to class, Monday and Wednesday

For each class there will be a reading assignment. For each reading there is a standard homework assignment. The assignment is to read the material and produce a 5 minute presentation on the reading. This roughly translates into 3 powerpoint ¹ slides, however, there may be more or less depending upon the complexity of the material.

In addition to summarizing the material please prepare a slide of material on what your opinion of the reading is. Architecture is a fifty year old debate, and I'd like you to participate! Tell us what you think. Are the author(s) full of it? Is the methodology sound? Do the idea(s) still apply to current technology?

Important: You should email your presentation to Douglas **and** myself prior to class each day. Generally speaking, Douglas grades these (pass/fail, with a pass unless we contact you). I like to read them for ideas and feedback. So send them to both of us, thanks!

¹By no means is Powerpoint required. Any presentation tool, even a text file will do.
