

Speaker Feedback

How well did the speaker. . . [on a scale of 1 to 5, plus comments]

- Stick to the 15-minute time period?
- Use visual aids to convey ideas? Did the visuals help the speaker make the points he/she wanted to make, or were they largely redundant or distracting (e.g., bullet points saying the same thing that the speaker is saying)?
- Describe the problem that the paper addresses?
- Describe what the paper contributed over previous work that had been done on the problem?

- Describe the paper's solution and results?

- Analyze the paper, providing a thoughtful discussion of the paper's methods and worth?

- Discuss how the paper might (or might not) be relevant to our research problem at hand (or to other interesting problems we may want to solve)?
