Model 145 Isotemp® Dry Bath Incubator

Holds 1 to 4 heating blocks with choice of 11 well sizes
Maintains every sample in within ±1.1° C of temperature

Unique sample wells are shaped so that air currents deliver same amount of heat to all parts of the sample tube. No laminar air gradient— neither up nor at the bottom nor too cold on the top—that may invalidate tests in vials with tilted cylindrical wells. Sample tubes rest on insulating pliers to prevent localized heating. A low cost, stainless-steel temperature-on-a-tick™ timer is heat resistant plate in the front of the bath. Plate is 3/16" thick (9.5 mm). Dry bath maintains cleaner problems because tubes stay dry.

Ambient to 125°F (52°C) with ±1.1°C control. Dial temperature controlled used from 25° to 35°C. Ideal for enzyme reactions, inoculation of sera, Bb studies, cross-matching and blood-typing determinations. (Dimensions: 8.1 x 15.9" x 4" H, 126 x 28 x 11 cm). With top cover and plug. Heating blocks sold separately (see lower right).

Electrical Requirements	Cat. No.	Each
200V, 60/50 Hz, 300W/250 approved	11-715-100	419.33
230V, 50/60 Hz, 800W	11-715-101	556.33

Model 147 Isotemp® Dry Bath

Holds single heating block with choice of 11 well sizes

Similar to Model 145, but with 3/16" thick (2.0 mm) plate. Ideal for labs with smaller volumes of enzyme and coagulant assays, Bb studies, and dry incubators. Forward-biased temperature control between ambient and 40°C (104°F). Observe thermometer panel to adjust sample temperature, adjust control through hole in top panel. Maintains set temperature with consistency and uniformity of ±0.5°C.

Supplier with strong nylon case, thermally-stable control heater and indicator amp. See case and plug and instructions. Dimensions: 8.1 x 6.5" W x 3" H, 115 x 17 x 8 cm. CSA approved. Heating blocks sold separately (see below).

Electrical Requirements	Cat. No.	Each
120V 50/60 Hz, 120W	11-715-102	223.58

Interchangeable Heating Blocks for Isotemp® Dry Baths

For Models 145 and 147 Dry Baths. Composed of black anodized aluminum alloy. Chemical resistant. Dimensions: 1.1 x 0.9" x 1.2" H (1.1 x 0.8 x 0.9 cm).

The 11-715-123 block provides a safe dry bath alternative for warming the Spalte of Essau tubes. Avoids hazardous use of burners around flammable biologicals, solvents.

The 11-715-120 block is specifically designed to hold twenty 9.5 mm Berthé Diagnostics Phlebotomy pregnancy test tubes. This special shallow well block is similar to the other block with 0.9 mm wells, but sample wells are only 1/8" deep (1.0 cm) to meet test requirements. Wells in all other blocks are 1/4" deep (6.4 mm).
