COURSE OBJECTIVES

The course objectives are two-fold: (1) to develop an awareness and understanding of the range, scope, and complexity of issues involved in starting a technology business; and (2) to gain insight into how entrepreneurs conceive, adapt, and execute strategies to create new, successful businesses.

COURSE OVERVIEW

This course is about entrepreneurship and specifically about starting, growing, managing, leading, and ultimately exiting a new venture. Of all the courses you take at the University of Washington, this one will likely be the most hands-on. Sixty percent of your grade will be based on pitches, product demos, and a business plan that you develop with your team.

The course sessions will follow the natural order of starting a new business: choosing your idea and your team, validating that idea with customers, honing your initial pitch, dealing with the legal issues of starting a business, building a great product, deciding among financing strategies, developing a go-to-market and operating plan, and exiting successfully. We will spend part of nearly every three-hour block giving you feedback on your actual pitch, your product, and your business generally. To ensure that this course is practical, we will invite numerous guests who are currently working in the venture ecosystem: CEOs, venture capitalists, lawyers, journalists, and others involved in the startup community.

BACKGROUND READING

David Cohen, Brad Feld, Do More Faster
Peter Thiel, Zero to One

GRADING

Grading for the class will be as follows:

<table>
<thead>
<tr>
<th>Component</th>
<th>Weight</th>
</tr>
</thead>
<tbody>
<tr>
<td>Class Contribution</td>
<td>30%</td>
</tr>
<tr>
<td>Class Assignments</td>
<td>10%</td>
</tr>
<tr>
<td>Term Project (in-class presentations, final presentation, and written material)</td>
<td>60%</td>
</tr>
</tbody>
</table>
DETAILED SYLLABUS, READINGS, AND ASSIGNMENTS
