# Problem

Incomplete shopping list

Choosing Items in the Store is Challenging

Comparison Shopping is Time Consuming

"Impulse Buy" When Item is On Sale

Hard to Navigate Store Efficiently

# Pro Shopper

- Mobile companion app
  - Efficient route planner
  - Smart product locator
  - Quick product comparison
  - Tailored to your preferences
  
- Highlights the best deals
  - Automatically include store promotions & coupons

# Representative Tasks

## Easy

Find the product that is the best priced to buy.

Given the list of items in your shopping list find a way to get around the store efficiently

Find an item not already on your shopping list

## Medium

Find where the specific product you wish to buy is located in the store/shelf

## Hard

For an item in the shopping list, find the product that is the best priced and doesn't contain certain ingredients you are allergic to (example: Nuts, Gluten, etc)

# Usability Testing

# Testing Procedure

- Provided overview for participants
  - Provided background on Interface
  - Inquired about their grocery shopping habits
- Asked & encouraged them to share their thoughts out loud during tasks
- Prevented testing bias
  - Prototype designer and evaluator did not overlap
    - 1 person designed the paper prototype
    - 2nd person ran the study to capture feedback objectively

# Design Evolution

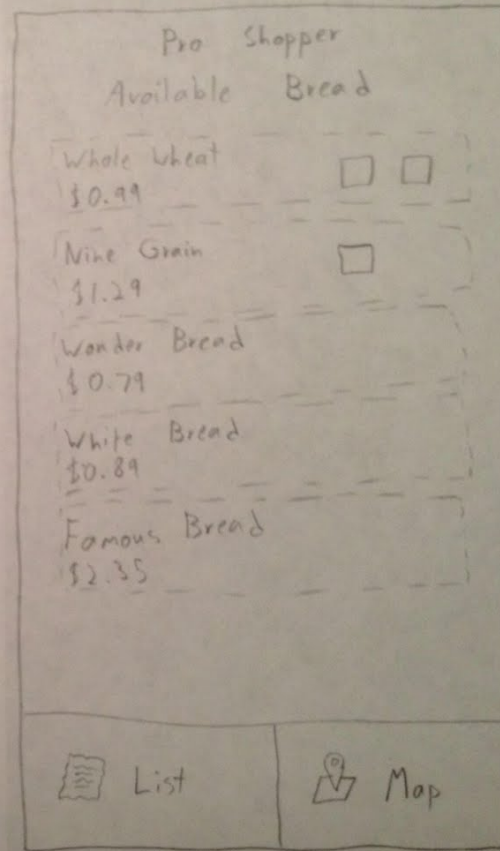

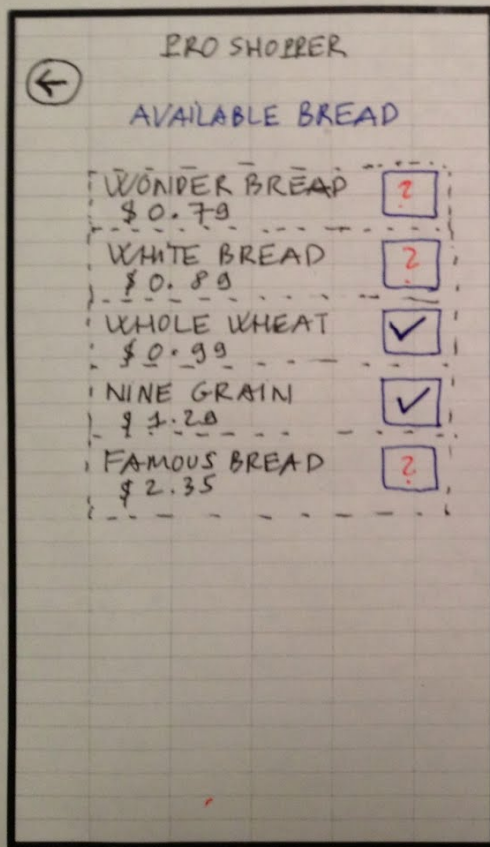

## Contextual Inquiry Results

- Framed problem we were solving
  - Make **comparison shopping easy**
  - Help users make **informed decisions**
  - Make it **quick & efficient to find items** in the store

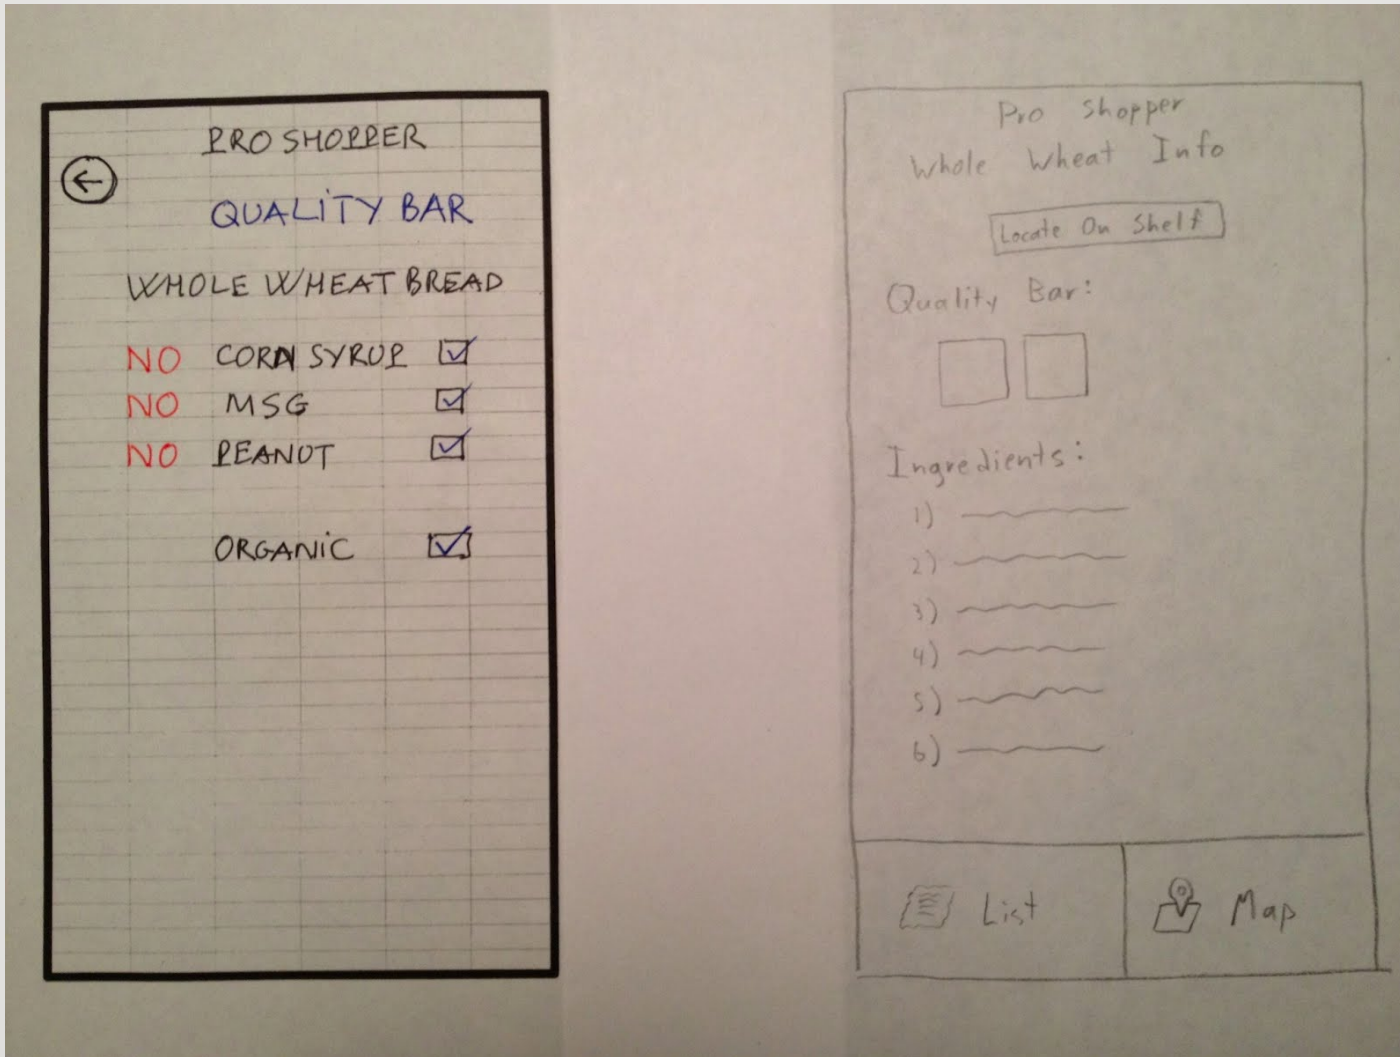

## User Study Results

- Refined interface based feedback
  - Provided an **add item affordance** from the list view
  - **Improved sort order** of products.
  - Included **ingredients list** in product details
