CSE 331: Software Design & Implementation
Section 3 – ADTs

Write two different representations for the Rectangle ADT in the starter code below, including **abstraction functions** and a rep invariant for each representation.

Write your class specification below

```
/**
 *
 *
 *
 *
 *
 */
public class Rectangle {
        Your fields for your representation, abstraction function, and rep invariant go below

}
```

```
/**
 *  Uses the same class specification as above
 */
public class Rectangle {
```
Your fields for your representation, abstraction function, and rep invariant go below
```
}
```
